

Hannevind 5,5kW

Hannevind 5,5kW including controller and 3pc of 3 meters fiberglass wings.

With a turbine diameter of 6 meters is this the turbine for you who has a energy needs of 8-10 000kWh/year. The turbine will be connected to the existing grid, work independent or with a power station where there is no electricity, for example an island or similar.

In Sweden this turbine requires building permission. Check the conditions in your country.

The turbine is mounted on a galvanized lattice tower with height options of 15-21 meters. The cut in wind speed is 2-4m/s and full capacity is achieved at 9 m/s.

Specifications:

Turbine diameter	6 Meters
Number of blades	3 PC
Connection	Grid or independent
Yearly output with a wind speed of 5,5m/s	Approximately: 10 000kW/h
Bulding permission	Check conditions
Monting options	Latticetower
Hights selectable	15-33 Meters
Cut in wind speed	2-4m/s
Full capacity at	9m/s
Wight of turbine	250kg
Voltage	400v 3Phase 50Hz
